

# SAND & SALT SOS™ STORAGE BINS

## Features:

Each SOS™ model is roto-moulded for durability and can be stored outdoors; they are TOUGH and hold up under any weather condition.

All SOS™ bins come with a moulded double walled lid for extra strength. This also makes them more resistant to impact and harsh weather conditions such as snow, sleet and freezing rain.

The lid also has a moulded hasp in the front making these bins lockable satisfying both safety and security needs.

All SOS™ models are fork liftable. Models SOS11, SOS18 and SOS36 have two forklift openings allowing for easy transportation and storage. While model SOS5.5 is forklift accessible by placing the forks under the moulded collar of the bin.

All sand and salt storage bins are stocked in yellow for high visibility, and grey for a more modern look.  
(Other colours are available upon request)

**Scoop:** The 3/16" wall thickness paired with the smooth rotomoulded handle makes Techstar's Scoop extremely durable. The scoop is perfectly matched for use with an SOS™ bin and stocked in yellow but is also available in our natural white colour which is food grade, and FDA approved.

## Selling Points:

Each of the SOS™ models nest inside of one another, perfect for easy stacking and for minimizing storage space. The nesting feature also helps in lowering the costs associated with shipping!

Backed by a 5 year manufacturing warranty, unheard of in the industry!

Unheard of  
**5 Year Warranty!**

Model Number	Cubic Ft.	Load Capacity (lbs)	Outside Dimensions (inches)	Shipping Weight (lbs)
SOS 5.5	5.5	500	30" x 24" x 23"	30 lbs
